CinemaTech Offers

Artisan Renderings

When a client builds a theater or customizes their seating, CinemaTech creates life-like 3-D renderings of the environment or seating, so the client can visualize the end result.

Custom Layouts

CinemaTech creates a layout and, if needed, a floorplan to show how the seats will be arranged.

Next-Day Material Samples

CinemaTech delivers most material samples the next day to meet critical timelines.

White Glove Service

CinemaTech installs the seats for the dealer so that their labor can focus on other critical components.

Design Service Program

Unparalleled Expertise. Obsessed With Your Vision.

Using CinemaTech's licensed design team, each homeowner is guided through an insightful process to achieve the best performance of the theater and a design that is tailored to their taste. CinemaTech takes into account several considerations including:

Design

What is your vision for how the theater looks and feels? Are you looking for a fresh modern space, transitional or turn of the century glamour? CinemaTech's design team creates over 70 bespoke cinema environments each year for every taste.

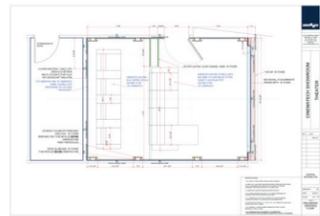

Seating

CinemaTech provides the proper riser depth, riser height and riser location for viewing along with walkways both in front of the seating and on each side of the seating. Our team ensures that the sight lines and viewing angles provide optimum viewing conditions.

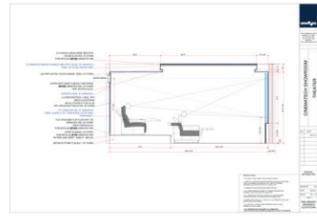

Acoustical Performance

CinemaTech recommends the placement of its ARS treatment to maximize the audio system. The acoustical treatment is designed to fit into any design without affecting the aesthetics of the space.

Rendering vs Actual

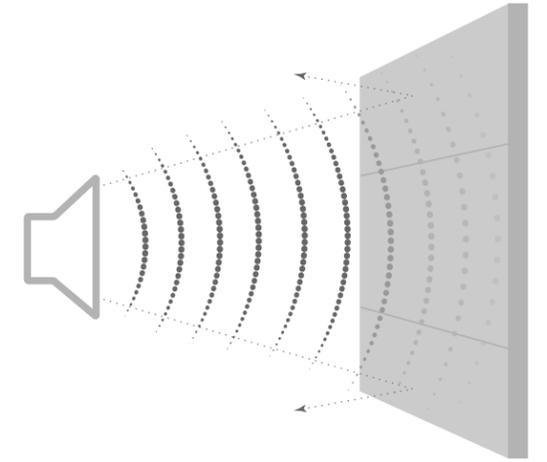

Acoustic Room System

Absorption + Reflection + Diffusion

With CinemaTech's ARS system, your private home theater acoustics will be engineered and precisely tuned based off the the room's design, the audio equipment and the physical elements within the space.

Through the precise design and installation of high and low-frequency absorption, reflective, and diffusive acoustic panels, CinemaTech engineers the theater environment to maximize the investment made in theater audio equipment.

Acoustic Performance Down to 100Hz in a 1.25" Profile

With its low 1 1/4" profile, the patented CinemaTech ARS system delivers award-winning performance down to 100Hz. No other system can deliver such a high-level of performance in such a shallow profile.

Form + Function + Aesthetic

CinemaTech's expert theater designers and skilled installation technicians can incorporate the ARS treatment into any theater installation without impacting the aesthetics of the space.

CinemaTech's Design Service Program ensures the acoustical wall treatments are smoothly integrated into the overall theater design before installation begins. The ARS treatment will provide a rich and beautiful audio experience, yet the acoustical panels will not be seen.

Essential to the Finest Home Cinemas

Since its founding in 1998, CinemaTech has created products that are essential to the finest home cinemas. Having built over 20,000 seats and designed over 1,000 theaters, CinemaTech has had the privilege of working with the finest estates in the world. Starting with the legendary, award-winning, Valentino, CinemaTech has become the gold standard for luxury seating, acoustical treatment and design expertise for home theaters.

We truly believe beauty comes from the inside out. All of our materials, from the seamless motor, to the premium dense foam and stitching are key to its beauty. Each CinemaTech product exhibits our passion for superior quality, craftsmanship and dedication to a premium cinema experience.

Your Theater Deserves CinemaTech.

Finest Leathers

The leather on a CinemaTech seat is unlike any other. It's the finest in the world. The superior finish of CinemaTech leather originates from a rigorous process, in which only 5% of the hides meet our quality standards.

Each hide is selected with acute sensitivity to imperfections, allowing only the best to be applied to your seat.

CinemaTech's aniline dyed leather is known for its exceptional beauty, rich texture and soft hand for a luxurious experience. Only the finest 1% of top grain hides may be aniline dyed.

Luxury Suede, Cashmeres & Wools

CinemaTech sources directly from top mills in Italy, including Alcantara and Loro Piana. With our partners sourcing the best raw materials in the world, the result is a seating surface that is one of the finest in the world.

Creating a premium seating surface not only entails attention to details, but responsibly harvesting raw materials and manufacturing the material in sustainable fashion.

Be it an incliner, sofa or chaise, CinemaTech's fabric offers the unique allure of comfort and timeless elegance.
